ABOUT THE AXOPAR 25

The Axopar 25 Cross Bow & Cross Top will have its official World Premiere during Dusseldorf BOOT 22, and serial production will start in January 2022, slightly later than planned as a result of the current pandemic wreaking havoc on global supply and manufacturing. The boats displayed at Cannes Yachting Festival are pre-production models aimed at gathering feedback and responses from the market prior to the model's World Premiere.

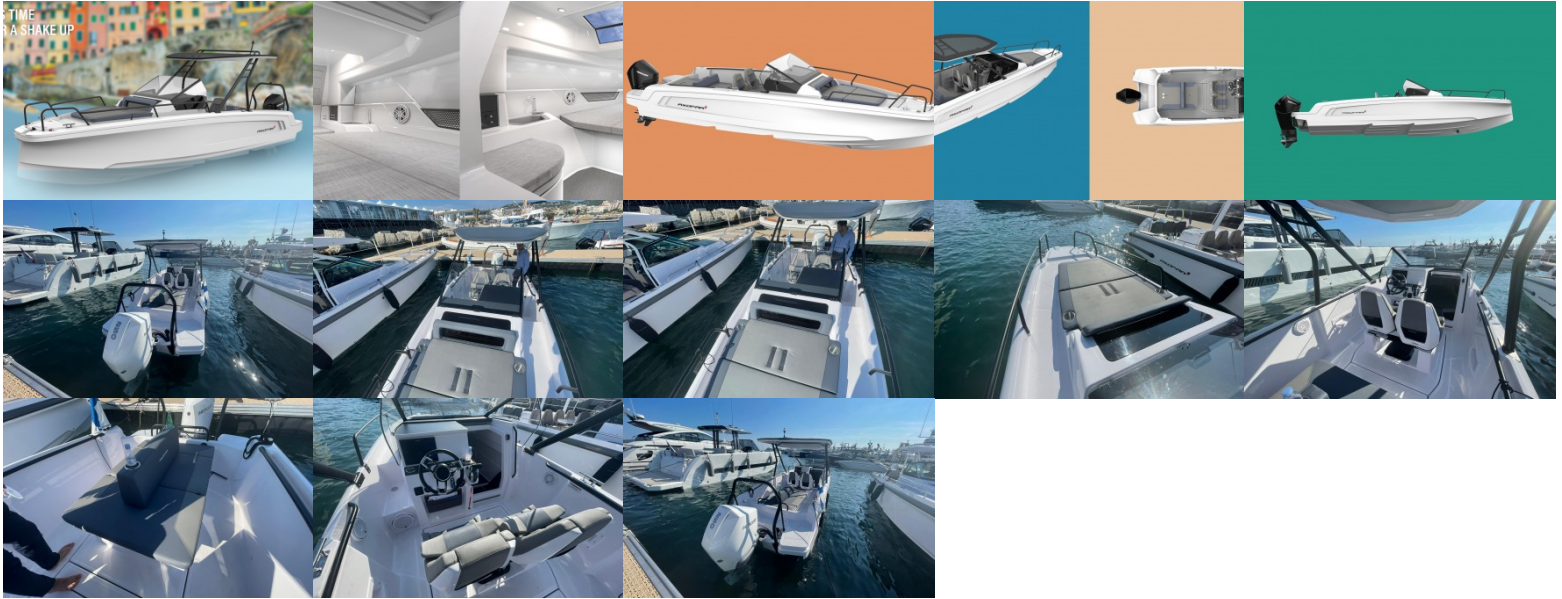

Due to current market situation and pricing fluctuations on raw materials, we reserve to present the preliminary pricing of the new Axopar 25 Cross Bow latest in Dusseldorf in January 2022. More information about the 25 will come closer to the World Premiere.

Contact us now if you want to be top of the list when the order books open.
