DESCRIPTION

The Sealine S25 offers a superb amount of on board space with many features found on much larger motor yachts. Below decks is a large open plan seating area that easily converts into a comfortable double bed. There is then a further cabin located aft with another double berth. The heads compartment is a good size and this particular example benefits from a new electric toilet. The Sealine S25's Galley is well fitted with a gas hob, hot and cold running water and good amounts of storage. The cockpit features a large teak table that can easily be removed for more floor space. As you will see from the images this S25 has the teak cockpit option which really does look fantastic. Should you require additional room on the bathing platform there is a fold down section allowing the bathing platform to be extended. Please contact us for more information.
