DESCRIPTION

The Colgate 26 has been designed to offer speed and more importantly stability on the waves. She has an efficient sail plan, and being easy to handle makes her a perfect first sailboat or sailing training, and whilst also used in racing they offer lots of room as a family sailboat too.

Ashwater is in pristine condition, the 4 berth cabin is spotless, and she has full fitted cushions inside and out which look as new. Rigging and sails are all in good condition, and her exterior and hull have been professionally cared for throughout ownership.

Extremely popular in the US, the Colgate 26 was designed by Olympic and America Cup Sailor Steve Colgate for use in his sailing school. There is a wealth of information on the [features of the Colgate 26 here](#), if you are unfamiliar with the boat. There is also a [Youtube channel](#) from the makers which display sailing tips using the 26 and more.

The model has room for plenty of sailors, a high boom and sunken cockpit to make manoeuvres easier, the ergonomic tiller is a breeze to use and a low transom allows easy access either to step-aboard or from the water.

We highly recommend viewings and she is currently on her berth in Torquay, Devon.
